

Circular Plastics Alliance

- Established by the Commission working with plastics converters to ensure that 10 million tonnes of recycled plastics are used to make new products in the EU in 2025.
- 5 priority topics
 - Collection and sorting of plastic waste
 - Product design for recycling
 - Recycled plastic content in products
 - R&D and investments, including chemical recycling
 - Monitoring of recycled plastics sold in the EU

CPA declaration

Supporting voluntary measures and activities for all stakeholders in the plastics value chains.

- EUPC will sign
- National and EU plastics association members encouraged to sign to demonstrate that our converting industry is serious about its content, objectives and vision.
- Signatures will not engage association in specific activities but open ways to engage in all the work ahead at EU level
- JG to attend meeting on 20th September
- Need to advise Plenary regarding signature

Monitoring recyclates for Europe More – EUPC tool

- Commission have set target of 10 million tonnes recycle to be used in new products by 2025
- EUPC have set up More tool to monitor the volumes – commission keen to adopt as monitoring tool within CPA
- Single, unified digital platform to monitor the uptake of recycled polymers into products
- Companies register with their VAT number and then submit volumes
- Could also do this on association level if interested
