

11. Circular Economy

Circular economy

- Definition – What does it mean for the resilient flooring sector?
- What aspects need to be considered: E.g, labelling, resource recovery, eco -design
- Gap analysis – What has been tried to date? What worked what didn't' work? What could be tried?
- Develop specific tasks
- What can be considered together what needs to be split into flooring categories (e.g PVC and non – PVC)
- Collections – Both groups work together; work with EUFCA members
